Bootcamp - Junior Software Developer

- **Generation Thailand**
  Jul 2023 - Oct 2023
- Learned how to build web applications from React as front-end, Node.js as back end, and MongoDB as a Database
- Learned fundamental soft skills for the workplace include creativity, persuasion, emotional intelligence, and collaboration
- Final project - Build the application website is divided into front end using React with React-router and Axios as the main dependency. In the back end, it uses Express to manage RESTful API and uses PassportJS for authentication.
  Finally, using Mongoose to connect MongoDB
